# PLAQUES, BOOKS AND SMALL-SIZE PLAQUE DESIGNS

Creative ideas for all areas of grave market design – individual and up to date

From lettering design on grave markers to the creative implementation of small grave markers up to individual, up-to-date designs of urn gravestones, we offer you many different ways to make your creative ideas and wishes a reality with our wide range of plaques, books, scrolls and writing surfaces.

In this chapter, you will find suggestions and examples for using plaques with raised or recessed lettering and symbols, plaques with superimposed lettering, plaques with broken-through lettering in stainless steel and bronze, as well as writing surfaces, books and scrolls to individualize with the texts, names and dates of your customers. – We guarantee you prompt delivery and the highest quality workmanship.

## The new Strassacker **PLAQUE CONFIGURATOR**

Intuitive and creative! – Achieve a successfully configured, individualised bronze or aluminium plaque in only a few steps.

With the new plaque configurator, you can now individualise plaques with font/motif raised (1,4 mm) online or freely configure them according to your ideas and the wishes of your customers.

For possibilities, suggestions and examples, see the Design Examples section or directly at [www.shop.strassacker.com](http://www.shop.strassacker.com), **ORDER PLAQUE**

From the layout to the finished plaque – handcraft knowledge stands for highest quality

Our designers use the information you and your families provide us with to create a digital layout. This layout is then sent to you for approval before our production process continues.

The approved layout is used to create the desired plaque form. From this a positive and negative mold is created.

Casting vents are carved into the sand to allow the bronze to flow and take its final form.

Every Plaque is sand cast. The bronze reaches an approximate temperature of 2282°F.

After the sand casting is completed, every plaque is chased by hand to ensure the highest quality and desired detail is achieved.

Once our chasers complete their work and the plaque passes the quality control it is patinated to your family's specifications.

Various products can be mounted onto our plaques. We make sure that the plaque and the modeled item get patinated together to ensure the patinas work with each other.

Once patinated, the raised lettering and design elements are rubbed to reveal the high quality bronze. Each plaque and modeled item then receives our very own clear coat.

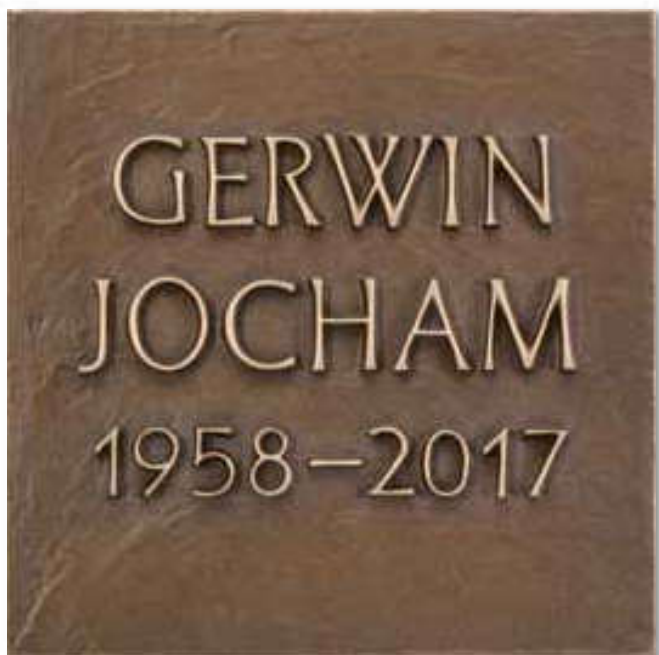

The plaque and modeled item are assembled and undergo one last quality control check. Each plaque is then carefully packaged to ensure a flawless finished product.

## PLAQUES | with superimposed lettering: »FINESTRA«, »ANTIQUA PARABEL« or »MODAN«
